

Philips AVENT
Natural Feeding Bottle

11oz

Medium Flow Nipple

SCF666

Less fussing, especially at night*

Less colic**

Unsettled and irritable behavior, known as fussing, is by far the most commonly known crying behavior in babies. Clinical studies show that the AVENT Bottle significantly reduces colic and fussing. Fussing is reduced especially at night*

Less fussing

- Clinically proven to significantly reduce fussing*

One piece anti-colic valve system

- Allows air into the bottle instead of your baby's tummy

Highly durable

- Honey-colored BPA-Free PES material for extra durability

Easy to clean

- Only three components for ease of cleaning

To fit your baby's growing needs

- Five different nipple flow rates are available

PHILIPS
AVENT

sense and simplicity

Highlights

Unique anti-colic valve

As your baby feeds, the unique skirt on the AVENT Nipple flexes to allow air into the bottle instead of your baby's tummy. Like natural breastfeeding your baby controls the milk flow.

0% BPA (Bisphenol A Free)

This bottle is made from PES – a BPA-Free material

Honey-colored PES material

This BPA-Free bottle (0% Bisphenol A) is made of honey-colored PES material for extra durability

Easy to clean

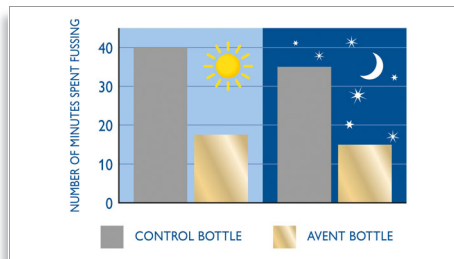

The feeding bottle consists of only three components for ease of cleaning and has an airtight cap for hygienic storage and transportation. In a randomised clinical trial the design of the Philips AVENT bottle was compared with another leading brand over a 12 month period. The maternal satisfaction in terms of ease of cleaning ($p=0.004$) and ease of assembly ($p=0.02$) was significantly better in the Philips AVENT bottle.

Fits your baby's growing needs

Five different nipple flow rates are available.

Significantly reduces fussing

Sleep and nutrition are vital to your baby's health and happiness. A randomised clinical trial was carried out to see whether infant feeding bottle design affects "infant behaviour". The Philips AVENT bottle was shown to significantly reduce fussing by approximately 28 minutes a day as compared to the comparator bottle (46 min vs 74 min, $p=0.05$). This was especially true during night-time.
